PROJECTS

Plot Booking Website

Role - Frontend Developer

- Developed and maintained the admin interface with advanced Ajax features for dynamic content loading.
- Integrated Ajax GET and POST methods to enable seamless communication with external APIs
- Implemented keyword, date, and dynamic dropdown filters to streamline data table interactions.
- Ensured the responsive rendering of plot map coordinates across desktop, tablet, and mobile devices.
- Optimized user experience by enhancing data retrieval performance and reducing page load times.

Books Search Application

Role - Frontend Developer

- Designed and developed a dynamic, responsive frontend interface with advanced Ajax-based content loading.
- Utilized Ajax GET and POST methods for seamless data retrieval and submission with external APIs.
- Implemented filters for data tables by keywords, dates, dropdowns, and states to enhance search functionality.

Himalaya Corp – Admin Web Application

Role - Frontend Developer

- Designed and developed a dynamic admin panel interface using Ajax for real-time content loading, covering employee, supplier, factory, and commodity management.
- Built role-based access control, allowing granular permission assignment by commodity, and tracked employee activity including login/logout status.

- Implemented purchase requisition and order management modules with auto-approval, WhatsApp notifications, and filtered by date, location, or commodity.
- Integrated internal messaging via a chat box interface, enabling users to send messages to vendors and brokers through secure API communication.

Grasses Informative Application

Role - Frontend & Wordpress Developer

- Collaborated with cross-functional teams to design and implement UI components, leading CSS customization for a visually consistent and responsive WordPress site.

Transporation Infomative Application

Role - Frontend & Wordpress Developer

- Designed and built a dynamic, responsive web application using WordPress, optimizing layout and performance across all device sizes.

Home Loans Informative Application

Role - Frontend Developer

- Enhanced platform UX/UI by building new pages, integrating team bios, and customizing content per client requirements.
- Created branded email templates using Salesforce to support marketing efforts.

Borrowers with commercial Loans Informative Application

Role - Frontend & Wordpress Developer

- Developed dynamic blog pages, updated loan rate content, and implemented client-specific edits for an informative platform.
- Designed and customized responsive email templates using Salesforce.
